**Subject:** Landfill data layer

Hi Michael and Jim,  
I'm wondering if there is a GIS data layer out there for the landfills that you could provide to us (perhaps as a .shp file). We have some graduate students working on a conservation plan for the entire Kalamazoo River Watershed. As a part of this plan, we'd like them to identify natural riparian areas that could be protected to compensate for some of the landfills that will be managed as permanent storage facilities.

Thanks,  
Jamie
